- Marathi
- Gujarat

👤 Profile

Motivated Computer Engineering student with strong skills in Python and web development, currently building an AI/ML-based Resume Analyzer and Mock Interview System. Passionate about solving real-world problems using intelligent systems and continuously improving technical expertise in software development and machine learning.

📜 Certificates

Complete 2026 Python Bootcamp: Learn Python from Scratch

Udemy | Instructor: Haris Ali Khan Completed: Jan 2026

- Learned Python fundamentals, OOP, and automation
- Built real-world projects including games and utilities
- Introduction to Flask for backend development

🧩 Internship Experience

Web Development Intern | Internpe

06/2025 – 07/2025 | Pune

- Developed responsive web applications using HTML, CSS, and PHP
- Worked on E-commerce and To-Do projects

Python Developer Intern | Internpe

01/2025 – 02/2025 | Pune

- Built multiple Python projects (Snake Game, Tic Tac Toe, Calculator)
- Strengthened logic building and debugging skills

🧩 Final Year Project

AI/ML-Based Resume Analyzer & Mock Interview System (Ongoing)

- Developing an intelligent system to analyze resumes using AI/ML techniques
- Implementing **ATS-based resume scoring system** based on keywords, skills, and formatting
- Building a **resume enhancement module** to suggest improvements for better job matching
- Designing an **AI-based mock interview system** to simulate interview questions and evaluate responses
- Working on **text analysis and NLP techniques** to extract and process resume data
